Remote Preference: Open to 100% Remote | Available for EST/GMT Overlap

PROFESSIONAL SUMMARY

Senior Developer with **8+ years of experience** specializing in **Nuxt and Vue 3**. Expert in architecting high-conversion fintech applications and scalable SPAs for **distributed global teams**. Proven track record of working autonomously in remote-first environments, delivering complex features like CRM automation and multi-step onboarding that **increased user registrations by 21%**.

TECHNICAL SKILLS

- **Core Stack:** Nuxt, Vue (2/3), TypeScript, JavaScript (ES6+), HTML5, CSS3 (SASS/Tailwind), PrimeVue, Vuetify.
- **Backend & Systems:** PHP (Laravel/Slim), Node.js, MySQL, Firebase, REST APIs.
- **Remote Tools:** Async Communication, Jira, Slack, Git/GitHub, Figma.
- **Specialties:** Fintech Onboarding (KYC), CRM Automation, IoT Dashboards, eCommerce (Shopify/Remix/PrestaShop), PWA, SPA, Landing Pages and Websites.

PROFESSIONAL EXPERIENCE

SQUARED FINANCIAL | Senior Full Stack Developer (Remote - CY) | May 2025 – Dec 2025

- **Architected a high-performance fintech onboarding application** using **Nuxt**, ensuring a modular frontend architecture.
- **Optimized the user acquisition funnel** by developing an interactive, multi-step registration system, resulting in a **21% increase in successful conversions**.
- **Automated CRM business processes** through backend integration, reducing manual administrative tasks and increasing data accuracy.
- **Collaborated asynchronously** with a cross-functional remote team to maintain rapid deployment cycles.

TRIVIAL | Lead Front End Developer (Remote - US) | Apr 2024 – Dec 2024

- **Led the frontend transition to Vue 3**, establishing best practices for state management and component architecture.
- **Designed and deployed interactive financial dashboards** and automated invoice generation tools for enterprise clients.
- **Managed project timelines independently**, ensuring 100% on-time delivery of features in a fully remote setup.

THE SITE DOCTOR (TSD) | Senior Front End Developer (Remote - UK) | May 2024 – Sep 2024

- **Developed a custom Shopify analytics application** using the **Remix Framework** and **Polaris UI**.
- **Engineered data visualization components** using **Chart.js** to translate complex Shopify API data into actionable business insights.
- **Engineered a custom-built company website** with **Nuxt 3**, implementing an automated **CMS-driven blog pipeline** to streamline content publishing and SEO optimization.

FREELANCE | Senior Front End Developer (Remote) | *Mar 2024 – Apr 2024* | *May 2023 – Dec 2023* | *Nov 2018 – Mar 2019*

- **Successfully delivered a diverse range of SPAs** utilizing JavaScript, PHP, Vue, and Nuxt for international clients.

DIGIMONDO | Front End Developer (Remote - DE) | *May 2021 – May 2023*

- **Developed enterprise-level IoT interfaces** for a leading German tech firm, focusing on real-time data monitoring.
- Maintained high standards for **remote collaboration**, utilizing Jira and Slack to coordinate across EU time zones.

EXAMIZ | Front End Developer (Remote - DE) | *Dec 2020 – Aug 2021*

- **Engineered an enterprise-level HR management platform** for large-scale corporations, focusing on complex data handling.
- Developed dynamic frontend components using **Vue.js** and **SCSS**, ensuring an accessible and consistent UI.

WEBIMPACTO | Web Developer (Remote - ES) | *Jun 2020 – Jun 2021*

- **Customized PrestaShop eCommerce solutions** using **PHP** and **Symfony**, delivering high-converting stores for global clients.
- Responsibilities included module configuration, debugging, and performance optimization.

OOMOVERS | Full-Stack Web Developer (Remote - CA) | *Jul 2019 – Jul 2021*

- **Architected and maintained a high-traffic web platform** for the moving industry using **PHP (Silex)** and JavaScript.
- Modernized legacy systems and optimized the booking funnel for a seamless mobile experience.
- **Led the front-end overhaul of the main company website**, implementing **conversion rate optimization (CRO)** and SEO best practices to drive higher user engagement and business growth.

KOMPITENZ | Full-Stack Web Developer (Banja Luka - BA) | *Mar 2019 – Jul 2019*

- **Engineered a large-scale B2B marketplace** for a major German dairy conglomerate, facilitating seamless digital transactions between manufacturers and global buyers.
- **Developed a highly responsive frontend** using **Vue.js** and **SASS**, ensuring an intuitive interface for complex industrial supply chain workflows.

- **Collaborated on a full-stack architecture** utilizing **PHP (Laravel)** to bridge backend business logic with high-performance user interfaces.

ALEA CONTROL | Front End Developer (Banja Luka - BA) | *Apr 2016 – Dec 2018*

- **Engineered real-time gambling and betting applications** for casinos and bookmakers, focusing on high-performance data rendering and secure user interfaces.
- **Facilitated cross-platform integrations** by collaborating directly with international partner developers and industry stakeholders to deliver complex betting logic.
- **Architected and maintained corporate web platforms** using **AngularJS** and **JavaScript**, ensuring high-security standards for sensitive gambling environments.

BITLAB | PHP Web Developer (Banja Luka - BA) | *Oct 2015 – Mar 2016*

- **Developed and maintained scalable web applications** using **PHP** and the **Laravel framework**, delivering custom digital solutions tailored to diverse client requirements.
- **Modernized and optimized legacy codebases**, improving application performance, security, and maintainability for long-term project stability.

SELECTED TECHNICAL PROJECTS

- **Fintech Onboarding Framework:** Architected a high-performance Nuxt 3 boilerplate with Pinia and Vee-Validate, reducing initial project setup time by 30% for secure financial applications.
- **IoT Dashboard Interface:** Developed a real-time Vue 2 visualization dashboard that optimizes Chart.js rendering to handle high-frequency industrial sensor data with sub-second latency.
- **Industrial Betting Terminal Engine:** Engineered high-stability, touch-optimized frontend systems for retail kiosks using WebSockets and AngularJS to deliver real-time odds updates with 24/7 reliability.

EDUCATION & CERTIFICATIONS

- **BSc, Faculty of Sciences** | University in Banja Luka
- **Professional Development:** Advanced PHP, OOP PHP, Javascript, and Basic Java Courses (INFOARS/ICBL).

LANGUAGES & INTERESTS

- **Languages:** English (C2 - Bilingual), Serbian/Bosnian/Croatian (Native).
